

## Koami-cho Communal Bldg

This is the first example in Japan of concrete panels reinforced with Technora rods being used to construct a curtain wall transparent to electromagnetic waves that will not trigger ghosting in TV reception.

- **Owner:**  
Chugoku Electric Power Co
- **Location:**  
Hiroshima Prefecture
- **Dimensions:**  
Curtain Wall, 500m
- **Materials:**  
Technora deformed  
 $\phi$  3.0 L=16,370m  
 $\phi$  7.4 L=5,030m
- **Application:**  
RC curtain wall replacement  
reinforcement (horizontal)
- **Completed:**  
Mar 95
- **ACC Projects list:**  
#55
